# Please note!

We are not an irrigation shop. We are not open to the public.

We are primarily an irrigation manufacturer and supplier. The majority of our products are distributed through Irrigation Unlimited, one of the leading irrigation suppliers in Southern Africa, directly to Co-Ops and irrigation shops all over Southern Africa.

The items that are not available through Irrigation Unlimited, such as our orange sprinkler heads, do not have a banner that says 'Afriq Water proudly distributed by IU'

## Labyrinth Irrigation

### Water-Wise irrigation without the need for an emitter.

Single-wing labyrinth drip irrigation tape is dripline without emitters. It has a labyrinth pattern shaped/pressed into the side (wing) of the tape, which controls flow and acts as a channel, after which dripper holes are punched into the drip, allowing for the same action as dripline irrigation, with less parts required.

### How Labyrinth Dripline Works

### Labyrinth Dripline Benefits

Irrigates uniformly on most soil types

Easy installation and dismantling

Can be gravity-fed if topography allows

Prevents diseases on leaves, stems & crop

Limited evaporation, wets soil not leaves

Ideal for most crop types, from veggies to fruits

Reduced weed growth as it wets only the beds

### Labyrinth Dripline Specifications

#### Dripline Essential Tools

Dia.	W/T	BAR Pressure	Fitting Type	L/H	MAX Lateral
16mm	0.15mm	0.5 - 1	Dripline (Ring)	3.0	72 m **

\*W/T is the Wall Thickness; i.e. how thick the wall of the pipes are. \*\* Max Lateral Length per line determined at 1 BAR pressure and flat, even conditions. Please note: We recommend the use of a filter with this system, as particles will cause wear-and-tear on inner walls of pipe.
