Labyrinth Irrigation

Water-Wise irrigation without the need for an emitter.

Single-wing labyrinth drip irrigation tape is dripline without emitters. It has a labyrinth pattern shaped/pressed into the side (wing) of the tape, which controls flow and acts as a channel, after which dripper holes are punched into the drip, allowing for the same action as dripline irrigation, with less parts required.

How Labyrinth Dripline Works

Labyrinth Dripline Benefits

Irrigates uniformly on most soil types

Easy installation and dismantling

Can be gravity-fed if topography allows

Prevents diseases on leaves, stems & crop

Limited evaporation, wets soil not leaves

Ideal for most crop types, from veggies to fruits

Reduced weed growth as it wets only the beds

Labyrinth Dripline Specifications

Labyrinth Specifications					
Dia.	W/T	BAR Pressure	Fitting Type	L/H	MAX Lateral
16mm	0.15mm	0.5 - 1	Dripline (Ring)	3.0	72 m **

*W/T is the Wall Thickness; i.e. how thick the wall of the pipes are. ** Max Lateral Length per line determined at 1 BAR pressure and flat, even conditions. Please note: We recommend the use of a filter with this system, as particles will cause wear-and-tear on inner walls of pipe.
